201	new recoil spring, full length or extended configuration.	
202		
203		
204	CHECKERING AND STIPLING NOTAS	
205	Please Read: There may be EXTRA CHARGES For Checkering and Stippling	
206	on specific brands as some manufacturers employ extra hardening techniques	
207	or unique alloys. The base prices above are for Colt and Springfield Armory	
208	4140 standard type Chrome-Moly frames.	
209		
210	The "harder alloys" results in increased tool wear and time by the pistol-smith/craftsman.	
211	This is entirely done by hand in the old world tradition. It is unmatched by machine	
212	type processes which look like they were done with a machine.	
213		
214	ADD: If you wish finer checkering with more lines than are usually	
215	standard for that particular position, please add 15% to the base price.	
216		
217	ADD: Again very hard aftermarket receivers like Caspian, and Kimber,	
218	or stainless steel frames, please add 25% to the base prices.	
219		
220	FRONT GRIP FRAME (20 Lines Per Inch)	Checkering \$200.00

239		
240	CUSTOM CARRY and SELF-DEFENSE WEAPONS	
241	People buy carry guns with the hopes that they will never have to use them.	
242	Unfortunately there are times when reality sets in and the need is justified for self-defense.	
243	Tailoring a carry firearm to the individual is a critical step in the process, more so,	
244	than for just punching holes in paper.	
245	The stakes are much higher and the stress requires a melding of the shooter and the firearm.
